# Resume Builder

June 2020 - August 2020

team-html08

## Overview

A resume builder is a software developed to simplify the task of creating a resume for individuals. The application provides an effective means of designing the desired resume, in fact, a professional-looking resume. The system is flexible to be used and reduces the need for thinking and designing an appropriate resume according to qualifications. Usually, individuals get confused while creating a resume especially for a novice person such as graduate students. They don't get a clear idea of what things and information must be included in a resume. Hence the system is developed to provide them an easy way for creating a professional-looking resume.

This project is user-friendly and requires minimum human intervention. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interests, skills, and so on. The answers provided by the users are stored and the system automatically generates a well-structured resume. Users have the option to create a resume in any format and file.

## Advantages

1. Provides instant resume to individuals.

2. There are choices available for resume format for users as per their qualifications and requirements.

3. Reduces tedious work in thinking and creating a resume and is convenient for users.

4. It provides quick access and is affordable.

5. The system saves time and reduces human efforts.

## Features

**Admin login:** Admin is the one who administers the system and input updates.

**User login:** Users have to create an account into the system by registering themselves. Then they may log in into the system and can utilize services.

**Resume templates:** The system contains various kinds of resume templates for all kinds of qualification i.e. for both fresher and experienced. And also according to the kind of degree one has.

**Resume form:** Users on selecting the format will be given an online form to be filled. The form includes questions like academics, personal, interests, hobbies, skills, courses, experience, and so on.

**Resume builder:** On submitting the form the system stores the data and within a short period generates a resume in the selected format.

**Choice of file:** Users have also given the option to choose the kind of file they wish to create the resume i.e. in PDF file or word file.

**Export facility:** Users can even export the file from word to PDF or vice-versa.

# Milestones

## I. June

      In the first month, we will be focusing on HTML and CSS by going through MDN documentation. We will start building a project after revisiting different tags and understanding our needs.  Also along with this, we will be getting some knowledge on Version  Control tools.

## II. July

      In the second month, we will be exploring animations,  Bootstrap , and Javascript. We will add this to our learning project and finish it off by July mid. Post-July-mid we start with designing the basic User Interface for our project.

## III. August

      In the third month, we will be focusing on adding functionalities using Javascript to our project  and will be deploying the same during the first half of the month. If time permits we will work on changing the same into a PWA.
